ASIST Tune-Up

Applied Suicide Intervention Skills Training Refresher

Canadian Mental Health Association/P.E.I. Division is hosting a half-day **ASIST Tune-up (Applied Suicide Intervention Skills Training)**.

Every few years, ASIST participants need to 'tune-up' their suicide intervention skills in a refresher workshop. The ASIST Tune-Up Workshop is a half-day program which focuses on tuning-up and practicing the suicide risk review and safeplan guide, the suicide intervention model (SIM) as well as reviewing available community resources.

In order to participate in this refresher, you must have completed the full two-day ASIST Workshop since 2003 (Tenth Edition). If you are unsure when you took the ASIST Workshop, the date is on your ASIST Certificate and the workshop Edition of your training is on the spine of your Suicide Intervention Handbook, both of which you received during your training. Please bring your Certificate and Handbook with you to the Tune-Up.

If you received your two-day training prior to 2003 (an early edition of ASIST) you will need to take the full two-day training in order to obtain your ASIST certification. Please see our website (www.cmha.pe.ca) for our next ASIST workshop dates.
